HOBBY PRODUCTS

**Quality and innovation for a
greener and more sustainable
future**

**The same quality,
with a sustainable
approach.**

Why Arber?

Our adventure began in 1996, driven by the passion of our founder for horticulture and botany. This passion led to the creation of Sudest Europe: a family business that has since become a leader in the marketing of hobby and professional substrates for horticulture.

In 2016, we underwent a rebranding to become **Arber Horticulture**. This transformation was motivated by two key reasons:

1. To fully express our passion and commitment to the field of horticulture: the name Arber is inspired by Agnes Arber, one of the most renowned scientists in the field of botany.

2. To reflect the expansion of our commercial horizon: from a company founded in Italy (in Southeastern Europe, which inspired the previous name Sudest) and primarily operating in the local market, we have grown into an entity that now distributes its products worldwide.

Arber® Horticulture is entirely dedicated to **helping professional growers and hobbyist retailers** achieve the best results in their activities.

We stand out for our product quality, our wide range of solutions, and our strong customer commitment.

Our mission is to promote a passion for greenery and respect for the environment, providing innovative and sustainable products that help both professionals and hobbyists cultivate healthy and lush plants.

By partnering with **Arber Horticulture**, hobbyist retailers can count on a reliable partner that places their needs first, contributing to their business success and customer satisfaction.

Join the Arber family and discover how we can grow together in the world of horticulture!

Sustainability

A Commitment to the Planet, A Greener Future

At Arber, we believe that taking care of nature means respecting it in every choice we make. That is why sustainability is at the core of our work:

- ✓ **Responsible Use of Resources:** our products are made from restored peat bogs and renewable raw materials, ensuring full environmental respect.
- ✓ **Green Packaging:** recyclable packaging or those made with second-life materials to reduce environmental impact.
- ✓ **Waste Reduction:** formulations designed to improve water absorption and minimize consumption, even during drought periods.

With Arber, you're not just choosing a product-you're making a tangible contribution to preserving the planet. Cultivate your green spaces in harmony with the environment.

Our Lines

Three Brands, One Passion for Greenery

Arber transforms every green space into a place of beauty and vitality with its brands dedicated to hobby gardening. Each brand is designed to meet the diverse needs of enthusiasts, offering high-quality products and formulations that guarantee excellent results.

Simple and High-Quality Solutions for Every Need

Leader is Arber's historic brand, designed for those seeking practical and reliable solutions. The line offers universal and specific substrates, perfect for caring for green, flowering, and succulent plants. Made with selected raw materials and free from compost, Leader products ensure vigorous and lasting growth, while respecting nature.

Naturally Driven, Organically Committed

Leader Bio represents excellence in organic gardening. Certified substrates and fertilizers for organic farming, enriched with nutrients of natural origin, provide ideal solutions for caring for vegetable gardens, aromatic plants, and sustainable crops. Leader Bio is the perfect choice for those who want lush greenery while respecting the environment.

A Greener Touch for Your Garden

Nathuro is Arber's innovative brand, designed for those seeking sustainable products without compromising quality. Enriched with natural additives and featuring waste-reducing formulations, Nathuro offers cutting-edge solutions for plant care in harmony with the planet. Perfect for blending a love for plants with eco-consciousness.

With Leader, Leader Bio, and Nathuro, Arber makes gardening a unique experience, satisfying every need and respecting nature. Because your green space deserves the best.

Quality

Passion for Excellence, Rooted in Nature

At Arber, quality is not just a goal; it's a promise. Every product in the hobby line stems from extensive professional experience in the sector to offer green enthusiasts solutions that meet their expectations.

- ✓ **Premium Raw Materials:** we use carefully selected German and Baltic peat, focusing on **block peat of higher quality rather than milled peat**, to ensure excellent substrates. All our products are **free from low-quality additives**, protecting plants and crops.
- ✓ **Advanced Formulations:** our substrates and fertilizers are enriched with essential nutrients, designed to stimulate vigorous growth and visible results.
- ✓ **Tailored to Every Need:** from repotting ornamental plants to caring for vegetables and flowers, Arber supports you with reliable and high-performance solutions.

The quality you see, the well-being you feel: choose Arber and transform your green space into a place of beauty.

Together with our partners, we are committed to constant research and technical innovation, combined with exceptional support for **garden centers and hobby retailers**.

Arber products are designed to offer the best formulas and technologies, providing ideal solutions for the needs of our gardening and DIY customers.

Our goal is to help **garden centers and retailers** meet their customers' needs, offering solutions that facilitate plant care and growth. Our customer focus translates into close collaboration with retailers, understanding their needs, and providing products and services that help them thrive in today's competitive market.

Arber Horticulture is the ideal partner for those who wish to offer their customers superior-quality products, supported by excellent service and a shared passion for greenery. Together, we can cultivate success and foster new opportunities in the world of hobby gardening.

leader

PLANT CARE

Citrus Slow-Release Fertilizer

Long-release fertilizer with granules that release nutrients gradually, ensuring continuous feeding and preventing micronutrient deficiencies. Ideal for those who wish to reduce the frequency of fertilization while maintaining health and vigour.

DOSES:

- 400-600 g per 10 m².

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x	x	x	x		

FUNCTION:

It nourishes and strengthens plants, making them more resilient, with a steady supply of nutrients for up to 3-4 months thanks to controlled release technology.

Cycas Fertilizer

Granular fertilizer designed for the unique needs of Cycas and other tropical plants. Contains an optimal balance of nutrients that strengthen roots and improve leaf coloration. Ideal for preventing yellowing and nutritional deficiencies typical of these plants, whether in pots or in the ground.

HOW TO USE:

Mix into the potting soil before planting or spread around the plants after planting. Lightly work it into the soil and water. Apply the final treatment at the end of summer.

DOSES:

- Pots: 3 g per liter of soil.
- Flowerbeds: 80 g/m².

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
			x	x	x	x	x				

FUNCTION:

It provides specific nutrient rich in microelements to promote healthy growth of Cycas and intensify bright green leaves, improving resistance to environmental stresses.

Universal Slow-Release Fertilizer

Multi-purpose granular fertilizer suitable for all garden and terrace plants. The balanced formula of nitrogen, phosphorus, and potassium, enriched with trace elements, promotes vigorous growth and maintains overall plant health. Ideal for those seeking a one-stop solution for feeding different plant varieties.

DOSES:

- Fruit trees: 60-80 g/plant.
- Vegetables: 50-60 g/m².
- Flowers: 50-70 g/m².
- Lawn: 30-40 g/m².
- Pots: distribute and bury lightly, adjusting according to accordance with the size of the pot.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x	x	x	x		

FUNCTION:

It nourishes and strengthens plants, making them more resilient, with a steady supply of nutrients for up to 3-4 months thanks to controlled release technology.

Roses Slow-Release Fertilizer

Specially formulated granular fertilizer for roses, with essential nutrients that stimulate vigorous growth and prolonged blooms. Contains microelements that improve disease resistance and flower quality. Enhances the beauty of roses in every season.

DOSES:

- Late winter and after flowering: 40-60 g/m² per rose bush.
- Pots: lightly distribute and bury the product, adjusting the dose according to the size of the pot.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x					

FUNCTION:

It provides specific nutrition rich in potassium and magnesium to ensure abundant blooms, intense colors and persistent fragrance in roses.

FUNCTION:

It improves soil structure and provides complete nutrient supply through the combination of organic and mineral elements, promoting the harmonious development of vegetables and ornamental plants.

Universal Mixed Organic

Granular organo-mineral fertilizer that combines the benefits of organic matter with the readiness of mineral nutrients. Ideal for vegetable gardens and flowering plants, it improves soil fertility, stimulates microbial life and ensures balanced nutrition. The granular formulation facilitates application and gradual release of nutrients.

DOSES:

- Pots: 3 g per liter of soil.
- Flower beds: 80 g per m².
- Approximate measurements: one teaspoon = 5 g; one tablespoon = 20 g; a handful = 30-40 g.

MONTHS OF USE

		X	X	X	X	X	X	X	X		

LIQUID FERTILIZERS

FUNCTION:

Rapidly corrects iron deficiencies and prevents leaf yellowing (chlorosis) in acid-loving, ornamental, and fruit plants.

Fertilizer Iron Sulfate

Liquid fertilizer with high soluble iron content, ideal for combating ferric chlorosis. Its formula ensures rapid absorption, restoring the leaves' intense green coloration. Especially indicated for vegetable crops, in vineyards and orchards both at planting and during production.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		X	X	X	X	X	X	X			

FUNCTION:

Provides specific potassium-rich nutrition for geraniums, stimulating vigorous growth and abundant and long-lasting flowering.

Geraniums Fertilizer

A liquid nutrient specifically formulated for geraniums and balcony plants. Its high potassium content enhances vibrant blooms, while essential trace elements help prevent nutritional deficiencies. The fast-acting formula delivers quick and visible results.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		X	X	X	X	X	X	X			

FUNCTION:

Supports balanced growth and stimulates lush flowering of orchids by providing specific low-salt nutrients.

Orchid Fertilizer

Mild liquid fertilizer specially designed for orchids. Contains a balanced combination of nutrients that promote root development and new bud formation. The low-salt formulation prevents stress to the plant.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
X	X	X	X	X	X	X	X	X	X	X	X

Acidophilic Plants Fertilizer

Specific liquid fertilizer for acidophilic plants such as azaleas, camellias and rhododendrons. The formula enriched with trace elements and acidifying agents ensures an optimal environment for nutrient uptake, stimulating abundant blooms with vibrant colors.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x	x	x			

FUNCTION:

Provides balanced nutrition and maintains ideal soil pH for acidophilic plants, promoting vigorous growth and spectacular blooms.

Green Plants Fertilizer

High-nitrogen liquid fertilizer designed to support the growth of indoor and outdoor green plants. Its balanced formula prevents nutritional deficiencies and keeps foliage healthy and decorative, ideal for ferns, ficus and tropical plants.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
x	x	x	x	x	x	x	x	x	x	x	x

FUNCTION:

It promotes lush leaf development and balanced growth in green plants, ensuring intense, bright color due to its high nitrogen content.

Oxblood Fertilizer

Traditional fertilizer made from animal blood mixed with urea. Rich in nitrogen and iron, it ensures healthy and balanced growth, ideal for green, flowering, fruit and vegetable plants, promoting vigorous development.

DOSES:

- Dilute 5-10 ml per liter of water.
- Treat every 10 days in spring, summer and fall. In winter, once a month.
- One capful (25 ml) dilute in 2-4 liters of water.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
	x	x	x	x	x						

FUNCTION:

Stimulates vegetative growth and strengthens plants through immediate supply of natural organic nitrogen and iron.

Universal Fertilizer

Organic liquid fertilizer ideal for flowering, indoor and garden plants. The special composition improves stress resistance, increases photosynthesis and ensures more vigorous and healthy plants with prolonged flowering.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
x	x	x	x	x	x	x	x	x	x	x	x

FUNCTION:

Provides balanced and immediate nutrition for a wide range of plants, promoting healthy growth and lush blooms.

Universal Fertilizer Algae

Organic liquid fertilizer based on brown algae extract, rich in natural phytohormones and minerals. It improves resistance to stress, increases photosynthesis and promotes vigorous growth, with more abundant and longer-lasting blooms.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x	x	x	x		

FUNCTION:

Provides complete and natural nourishment through the stimulating action of brown algae, improving plant vitality and resistance.

Succulents Fertilizer

Liquid fertilizer with a nutritional balance suitable for succulents, preventing overgrowth and promoting resistance to environmental stresses. The liquid formulation facilitates the application and absorption of nutrients.

DOSES:

- Dilute one capful (20 ml) in 2 liters of water.
- Water once a week in spring-summer and every 15 days in autumn-winter.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
		x	x	x	x	x	x	x			

FUNCTION:

Provides specific low-nitrogen nutrient supply to stimulate healthy growth of succulents without vegetative excesses.

Water Gel

Water Gel uses special cellulose fibers that retain water, gradually releasing it through the action of microorganisms in the soil. Ideal for keeping plants hydrated during prolonged absences or intense heat.

DOSES:

Pour into the pot with moist potting soil every 10 days, following these doses:

- 18-22 cm pot: 100-150 ml
- Vase 22-26 cm or balcony 40x16x13 cm: 150-200 ml
- Vase 26-30 cm or balcony 60x17x15 cm: 200-250 ml
- Jar > 30 cm: 300-500 ml

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
					x	x	x	x			

FUNCTION:

It ensures consistent and balanced watering for plants, reducing the need for frequent watering by up to 20-30 days.

FUNGUS CONTROL

Copper + Sulfur Supplement

A supplement containing copper and sulfur, essential elements for plant health. Contains iron, manganese and zinc chelates that strengthen plants, making them more vigorous and hardy. Ideal for roses, flowering plants, green plants and vegetable gardens.

DOSES:

Ready-to-use product to be sprayed evenly at 20-30 cm from the plant every 10-15 days. Shake before use.

MONTHS OF USE

J	F	M	A	M	J	J	A	S	O	N	D
	x	x	x	x	x			x	x		

FUNCTION:

Protects plants from fungal diseases and pests, improving natural resistance and preventing leaf yellowing and brown spots.

PLANT
PROTECTION

INSECT PROTECTION

Triple Action Plus

A product based on extracts of horsetail and nettle, which strengthen plant tissues and inhibit the development of fungal diseases and insect infestations. Effective against powdery mildew, downy mildew, aphids, thrips and red spider mite, it is a natural solution for plant health.

DOSES:

Spray evenly at 30 cm, treat in spring-summer every 10-15 days preventively. In case of infestation, repeat every 7-10 days. Wait 48 hours before consuming crops.

FUNCTION:

Provides comprehensive protection to plants with a combined fungicide, insecticide and acaricide action of natural origin.

Snail Controller

Natural granular product that acts as a deterrent to slugs and snails. It forms a physical barrier around plants, preventing pests from reaching them without the use of harmful chemicals.

DOSES:

Spread a 3-4 cm strip around the plants. Also suitable for potted plants.

FUNCTION:

It naturally protects plants from slugs and snails, creating an effective barrier that prevents damage to gardens and vegetable gardens.

www.arber.it

Neem Oil

Natural oil extracted from the seeds of the Neem tree, rich in active ingredients with insecticidal and repellent properties. Effective against aphids, mealybugs, whiteflies and other harmful insects, it helps keep plants healthy without harming the environment.

DOSES:

- Spray from 20-30 cm.
- Repeat every 8-12 days. Treat during cool hours.

FUNCTION:

Acts as a specific natural insecticide, protecting plants from a wide range of pests due to the repellent properties of azadirachtin.

Insects Controller

Product based on broad-spectrum plant extracts that act against different types of harmful insects. Inhibits insect feeding, providing an environmentally friendly solution for plant protection without harming beneficial insects.

DOSES:

Spray evenly, avoid dripping. Treat in the evening. Do not mix with copper, sulfur or oils.

FUNCTION:

Eliminates and prevents pest infestations naturally, ensuring healthy and stress-free growth.

Afid Controller

State-of-the-art product with specific plant extracts that ward off aphids and inhibit their feeding. Protects plants without the use of chemical pesticides, respecting the natural balance of the garden.

DOSES:

Spray evenly, avoiding dripping. Treat in the evening. Do not mix with copper, sulfur or oils.

FUNCTION:

It effectively combats aphid attacks naturally, preventing plant damage and promoting healthy growth.

Fungal Controller

Corroborant based on soy lecithin, a natural phospholipid that improves plant resistance to biotic stresses. It helps prevent the development of pathogenic fungi such as powdery mildew and downy mildew by strengthening plants' natural defenses.

DOSES:

Spray from 40-50 cm, repeat every 5-10 days. Treat preventively in autumn and late winter.

FUNCTION:

Prevents and fights major fungal diseases naturally by strengthening plant defenses with soy lecithin.

Triple Action Plus

A product based on extracts of horsetail and nettle, which strengthen plant tissues and inhibit the development of fungal diseases and insect infestations. Effective against powdery mildew, downy mildew, aphids, thrips and red spider mite, it is a natural solution for plant health.

DOSES:

Spray evenly at 30 cm, treat in spring-summer every 10-15 days preventively. In case of infestation, repeat every 7-10 days. Wait 48 hours before consuming crops.

FUNCTION:

Provides comprehensive protection to plants with a combined fungicide, insecticide and acaricide action of natural origin.

PLANT STRENGTHENER

Vinegar - Ready-to-Use

It is a plant strengthener obtained thanks to the action of bacteria of the Acetobacter genus, which, in the presence of air, oxidize the ethanol contained in wine or fruit, transforming it into acetic acid. The percentage of acetic acid produced varies depending on the type of fermentation. **Vinegar used in cooking typically contains between 3-5% acetic acid, whereas this product reaches an 11% concentration.** Thanks to its acidity, vinegar is used as a plant strengthener to lower the pH of water when performing treatments with organic products, some of which lose or reduce their effectiveness at neutral or alkaline pH.

DOSES:

Shake well before use and spray the product evenly from a distance of 20-30 cm, repeating the operation every 10-15 days. 100 ml is enough to treat up to 1 m². **It is non-selective; it acts on all plants on which it is sprayed.**

FUNZIONE:

When it comes into contact with all types of green plants (e.g. flowers, weeds, etc.), it **exerts a caustic action**, meaning that upon contact it deeply alters the plant **tissues until they are burned or destroyed.**

Volcanic Lapillus

Environmentally friendly volcanic granulate with excellent draining and mulching properties. Ideal for gardens, parks and flower beds, reduces water evaporation and prevents the growth of weeds. Its intense color adds a decorative touch to green spaces.

FUNCTION:

It improves soil structure, promotes drainage and protects plants through mulching and decorative action.

Pine Bark

Natural mulch made from selected pine bark. Used to decorate and protect flower beds, hedges and slopes, it conserves soil moisture and prevents unwanted weed infestations. Environmentally safe and long-lasting.

Structure: Medium/Coarse

FUNCTION:

It protects the soil, maintains moisture and reduces weed growth, improving the aesthetic appearance of the garden.

Clay

High-quality expanded clay ideal for growing in pots, planters, hydroponics and hanging gardens. Light and stable, it improves root aeration and prevents water stagnation, promoting healthy plant growth.

FUNCTION:

It improves soil structure, promoting aeration and drainage, and acts as a draining layer in pots.

leader

SOIL CONDITIONERS

SOIL CONDITIONERS

FUNCTION:
It enriches the soil with natural organic substances, improving fertility and promoting vigorous plant growth.

Manure

Natural dried organic soil conditioner, rich in slow-release nitrogen and trace elements. Improves soil structure and microbial activity, increasing fertility in gardens, vegetable gardens and orchards. Ideal for large agricultural areas.

FUNCTION:
Provides a natural organic supply to the soil with controlled release of nutrients, improving plant fertility and growth.

Pellet Stallage

Dried natural organic pelleted soil conditioner. Provides even and sustained release of nutrients. Facilitates application and reduces runoff losses. Recommended for crops that require constant and regular nutrition.

www.arber.it

leader

HOME PROTECTION

REPELLENTS

leader

FUNCTION:

Provides specific low-nitrogen nutrient supply to stimulate healthy growth of succulents without vegetative excesses.

Spheragel Lemon

360 ml

24 Pieces

A fragrance made from citronella essential oils, ideal for scenting outdoor spaces such as gardens and patios. The natural fragrance gently and non-invasively drives away insects, making outdoor evenings more pleasant.

DOSES:

Place the jar at mid-height at least 30 minutes before occupying the space.

FUNCTION:

Repels mosquitoes by creating a natural scented barrier, allowing you to enjoy outdoor spaces without disturbances

Spheragel Eucalyptus

360 ml

24 Pieces

Scented gel with eucalyptus essential oils. It releases a pleasant aroma for humans but is unpleasant for mosquitoes, providing long-lasting protection for the surrounding environment. Safe for animals, plants, and the environment.

DOSES:

Place the jar at mid-height at least 30 minutes before occupying the space.

www.arber.it

leader

NATURAL REPELLENTS

NATURAL REPELLENTS

leader

Ant Repellent

500 ml

12 Pieces

Natural repellent with plant essences unwelcome to ants. Ideal for home and garden use, it is not harmful to people, animals or plants, and helps prevent infestations in an environmentally friendly way.

DOSES:

Spray evenly in infested places. Treat daily initially, then reduce frequency

FUNCTION:

Wards off ants naturally and safely, creating an olfactory barrier that protects home environments and green areas.

Insect Repellent

500 ml

12 Pieces

Natural product that drives away unwanted insects through a mixture of plant essences. It forms an olfactory barrier that deters insects without the use of chemicals, protecting green areas and home environments.

DOSES:

Spray evenly in infested places. Treat daily initially, then thin out. Repeat after rains.

FUNCTION:

It effectively represses nuisance insects, creating an environment unfavorable to their presence safely and naturally.

www.arber.it

Canine & Cat Repellent

Blend of natural essential oils that has a deterrent effect on dogs and cats. The active ingredient, unbearable to animals but pleasant to humans, creates an olfactory barrier that drives them away from the treated areas.

DOSES:

Clean the area to be treated. Spray from 30-40 cm, initially 3-4 times a day, then every other day. Test on delicate surfaces.

FUNCTION:

Keeps dogs and cats out of sensitive areas, protecting gardens and outdoor spaces without harming animals.

UNIVERSAL POTTING SOILS

UNIVERSAL POTTING SOILS

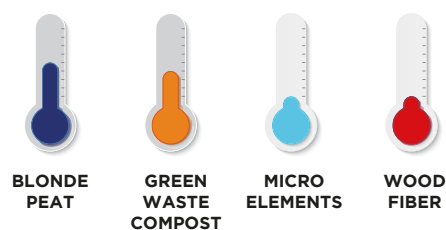

Full Action

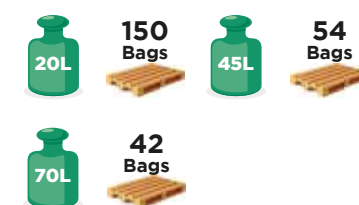

Substrate composed of peats, green compost and a starter with microelements. Ideal for growing in pots and crates, it ensures healthy and vigorous plants due to naturally derived nutrients.

FUNCTION:
High-quality universal substrate for lush growth and abundant blooms of all plants naturally.

COMPOSITION

Origin: Italy

Structure: Medium

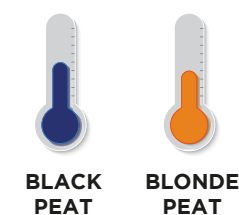

Baltic Uniplus

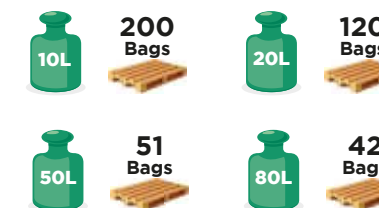

Substrate prepared from blond and dark Baltic peats, known for their lightness and draining capacity. The fertilizer-rich formula ensures vigorous plants. It is ideal for repotting and growing any type of indoor or outdoor plants, except acidophilic plants. Recommended for cool climate areas or autumn repotting.

FUNCTION:
High-quality universal substrate for all green and flowering plants, ensures steady, lush growth with excellent drainage.

COMPOSITION

Fertilizer: YES
Origin: Baltic Countries

Structure: Medium

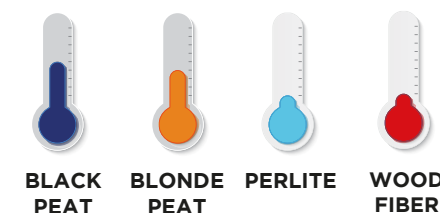

FUNCTION:
Top-grade universal substrate, ideal for all green and flowering plants, both indoors and outdoors, with excellent water retention.

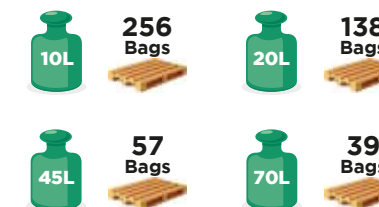

German Uniplus

Substrate prepared with blond and black German peats and perlite. It is rich in fertilizer to ensure lush and consistent growth over time. Perlite improves root aeration and prevents excess moisture. Ideal for sowing and growing all potted plants except acidophilic plants. Especially suitable for warm climate zones or spring repotting. Recommended for those who demand the best in a substrate.

COMPOSITION

Fertilizer: Yes
Origin: Germany

Structure: Medium

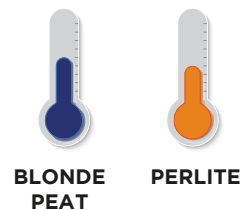

Carnivorous Plants

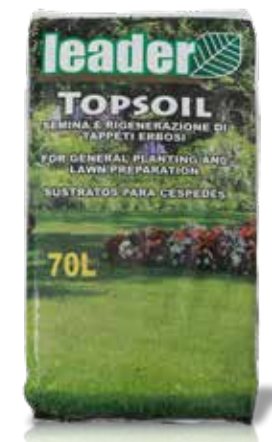

Nutrient-poor, acid pH substrate composed mainly of blond peat and perlite. It reproduces the natural habitat of carnivorous plants, promoting the growth and development of effective traps.

COMPOSITION

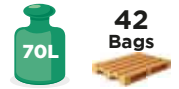

Origin: Baltic Countries
Structure: Medium

FUNCTION:
It provides a specific substrate for growing carnivorous plants, respecting their nutrient and pH requirements.

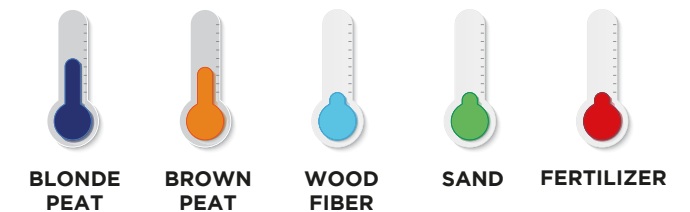

TopSoil

Specific substrate for the creation and regeneration of lawns. The composition with added sand ensures optimal permeability, preventing water stagnation and ensuring a stable structure over time. Ideal for obtaining a dense and durable lawn.

COMPOSITION

Origin: Baltic Countries

Structure: Medium

FUNCTION:
It prepares and regenerates lawns, improving soil structure and promoting uniform and healthy turf growth.

POTTING SOILS FOR ACID-LOVING PLANTS

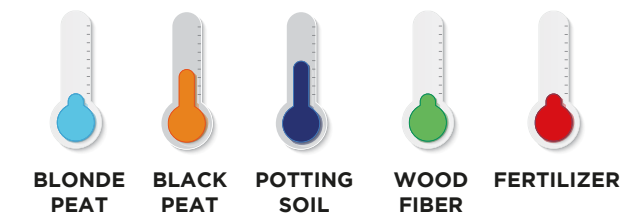

Azaleas and Acidophilic Plants

Specific potting soil with selected peats and acidifying agents that keep pH low, which is essential for acidophilic plants. It ensures excellent water retention and nutrient availability, promoting plant health and beauty.

COMPOSITION

Origin: Germany

Structure: Fine/Medium

FUNCTION:
It provides an ideal substrate with constant acid pH for azaleas, camellias and other acidophilic plants, promoting healthy growth and abundant blooms.

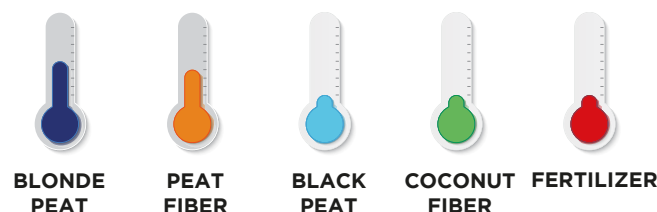

Bio Fruit

Specific organic substrate for planting and pot cultivation of vegetables and herbs. Composed of organic raw materials, it promotes vigorous plant development, improving the fertility of the soil and the quality of crops. Ideal for those seeking sustainable and natural solutions for their vegetable garden.

COMPOSITION

Origin: Lithuania

Structure: Medium/Coarse

FUNCTION:

An organic substrate specifically for citrus and fruit plants, it promotes healthy growth and abundant production naturally.

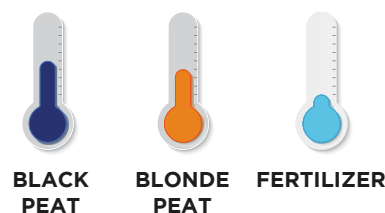

Bio Hortus

Specific organic substrate for planting and pot cultivation of vegetables and herbs. Composed of organic raw materials, it promotes a vigorous plant development, improving the fertility of the soil and the quality of crops. Ideal for those seeking sustainable and natural solutions for their vegetable garden.

COMPOSITION

Origin: Lithuania
Structure: Medium

FUNCTION:

Multi-purpose organic substrate for vegetable garden, orchard and herbs, promotes vigorous growth in an all-natural way.

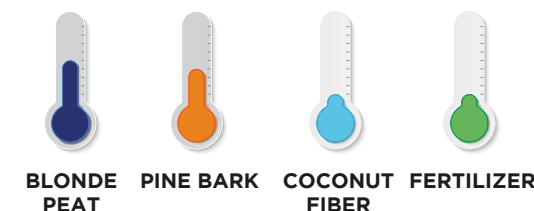

Orchids

Specially formulated substrate with pine bark, peat and other components that provide an airy and draining environment. Supports aerial root development and promotes lush flowering of epiphytic and semi-epiphytic orchids.

COMPOSITION

Origin: Italy

Structure: Medium

FUNCTION:

It provides an ideal substrate for potting and re-potting orchids, meeting their specific needs for aeration and drainage.

POTTING SOILS FOR PALMS AND GREEN PLANTS

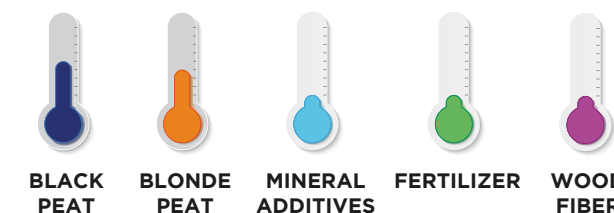

Palm Trees

Substrate rich in nutrients and materials that promote drainage, such as sand and perlite. It ensures the special conditions required by palms and long-lived plants, supporting healthy and vigorous growth.

COMPOSITION

Origin: Germany

Structure: Medium

FUNCTION:

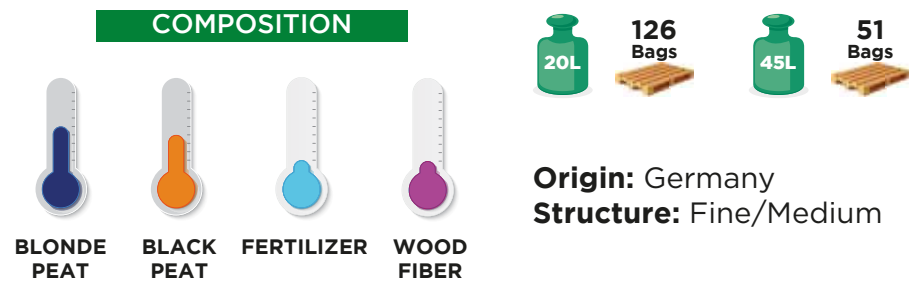

It provides an ideal substrate for palms and green plants, ensuring the right conditions of moisture, aeration and nutrition.

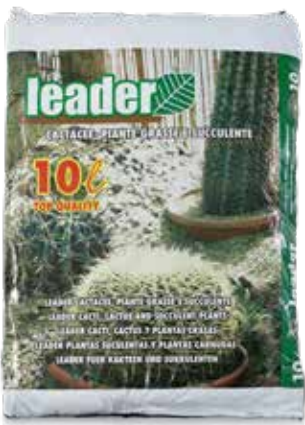

FUNCTION:
Provides a specific substrate for geraniums and flowering plants, promoting optimal rooting and abundant and long-lasting blooms.

Geraniums

Potting soil with a formula enriched with nutrients and materials that improve soil structure. It provides an ideal balance of water retention and aeration, supporting the specific needs of geraniums for excellent results.

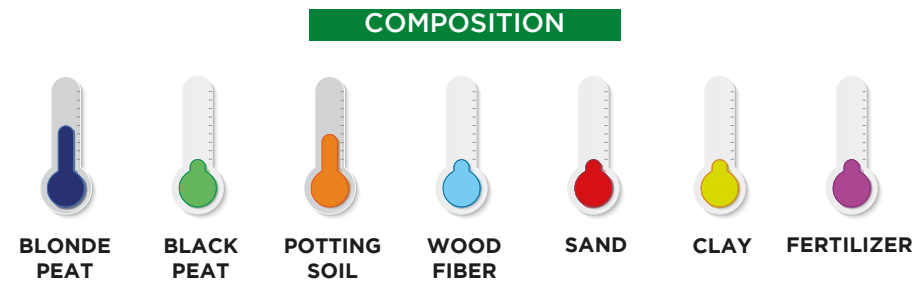

POTTING SOILS FOR SUCCULENT PLANTS

FUNCTION:
It provides an ideal substrate for growing succulent plants, ensuring the right balance of drainage and water retention.

Cactaceae

Formula composed of sand, perlite and peat, which creates a well-drained environment essential for succulents. Prevents water stagnation that can cause root rot, promoting healthy growth.
